Broiler Houses

Powell & Co Construction Ltd is one of the UK's leading nationwide manufacturers of commercial poultry housing, agricultural and industrial buildings.

Established in 1998, the family run business is dedicated to designing and building the best solutions for modern poultry production. Powell & Co work in partnership with businesses of all sizes, on a wide range of projects, in a range of sectors and locations across the UK. Operating from Kingsland near Leominster, Herefordshire, the experienced dedicated team provide the complete solution from initial design right through project sign off and beyond.

A quality service from start to finish comes as standard. From the initial enquiry through to site visits, compliance and construction, a Powell & Co build isn't finished until all of the detailing is complete and the customer is happy.

From 4,000 to 100,000 bird houses, we are nationwide specialists in the design and build of high-quality broiler houses.

From initial design to bird delivery, we are experts throughout every stage to meet the client's requirements from stock density to challenging site conditions.

- Free Range or Intensive
- Tunnel, ridge vent or Powell's unique Summer ventilation systems
- Front canopies with catching curtains
- Step-over barriers
- Mortality hatches

We work with the stakeholders of your choice, to ensure you achieve the best and most efficient system for optimum return on your flock.

Free Range Units

Our free range units are designed and built to typically accommodate 16,000 or 32,000 birds, although we build specifically to your flock size.

We work in partnership with your equipment suppliers to deliver an exceptional layout that achieves an environment that optimises freedom of movement for birds, maximising egg production.

Powell & Co free range units deliver the commercial benefits for flock health, egg production, packing and storage.

Breeders, Rearing & Vaccine

We understand attention to detail is essential and nationwide we have built a wide range of breeder, rearing and vaccine units.

Our experienced team work closely with clients throughout the design process providing drawings and visuals to ensure specifications are met before build commences. From the planning to the initial site survey, groundworks, construction and final sign off for bird delivery, we can take care of it all. For future flock success, we lay the foundations from the groundworks right through to the finished unit.

Buils are completed to the highest standards and we fully understand the pressure of building to a deadline date. We recognise and adapt to the challenges and changes that can occur during a tight build schedule.

Turkey Houses

We have designed, fabricated and constructed turkey houses nationwide, enabling clients to achieve maximum commercial benefits from exceptionally well laid out houses.

Our builds have included modern turkey breeding houses along with free range houses. We understand that producers often have bespoke specifications for house size, particularly height and we are experienced in meeting these requirements.

In addition to new houses, the Powell & Co team have completed many refurbishments to improve the performance of the house, the environmental credentials and overall appearance.

Timber Frame or Clear Span

The Powell & Co timber framed poultry houses are the perfect solution for a customer wanting a timber framed build, which in some cases can be a more cost effective option than steel.

Buildings can be steel, timber clad, or finished with a mix of the two cladding options creating an attractive end solution.

Our bespoke construction service and build quality are second to none with each build completed to the customer's exact requirements.

Ancillary Buildings

A project often extends beyond housing just for birds and as such we are experienced in incorporating amenity buildings into your project, either alongside a poultry housing construction or as a later addition.

Customers have a wide range of requirements including:

- New clean and dirty segregated buildings
- Offices and meeting rooms
- Staff facilities, showers, WC
- Canteen
- Catchers welfare facilities
- Storage and packing areas
- Workshops
- Biomass buildings

Refurbishment

We offer the complete solution for all poultry houses and agricultural buildings when a refurbishment is required.

From converting to free range, internal re-fits and extensions, we are experienced in all aspects to ensure your poultry housing is maximising its potential and lifespan.

Recent refurbishment projects include:

- Extending the length of poultry housing
- Change of ventilation system
- Conversion to free-range
- Repairing shed entrances following catcher damage
- Re-roofing following storm damage
- Retrofitting windows to conform with Red Tractor
- Housing enhancements to conform with assurance schemes
- Timber and steel cladding
- Bio-security improvements

Agricultural Buildings & Calf Sheds

With our extensive experience of the agricultural sector we have forged a great reputation both locally and nationwide for timber and steel agricultural buildings.

The portfolio we have designed and built is extensive and includes buildings of all sizes for storage of grain, potatoes, machinery and livestock. For businesses that are looking to grow or diversify our team are experienced in assisting with extensions, conversions and internal re-fits. Whether it is office space, equestrian stables or yards, workshops or biomass plant rooms, we can meet your requirements.

The insight we have in the poultry sector, particularly broilers, enables us to utilise our expertise in the design of calf sheds. Poultry units provide a climate-controlled draft-free environment, ideal for rearing calves. The standard design of a Powell & Co poultry building can easily be adapted to provide an environment suitable for calves that also delivers excellent ventilation and bio-security.

Whether it is a basic steel-framed calf shed or a more complex shed with group pens and individual fully plastic slatted pens, we have the solution. In addition, we can incorporate areas for milk mixing, washing, feed storage and amenity buildings for staff.

Industrial Buildings & Steel Fabrication

Powell & Co Construction Ltd is a leading fabricator of high-quality steel for a variety of structures including poultry houses, agricultural buildings, factories, industrial and retail units.

When it comes to steel and structures our team has over 100 years of experience with a wealth of knowledge, insight and advice for all projects. We provide expertise at each step from estimating, contracting supplies, compliance, design, production and construction to deliver what you need.

The Shobdon steel fabrication site in Herefordshire allows us to fabricate high-quality steels and has a long track record of the highest quality build standards and tailored personal service.

- 12,000m² site with 3,000m² factory
- On average over 3,000 tonnes of steel fabricated and delivered across the UK, per annum
- Inhouse CNC drill line
- Beams up to 16m long can be drilled
- The team have drilled and fabricated beams that are 914x305x224 UB weighing just over 2 tonnes each

We are fully accredited and investment in specialist machinery allows us to create all types of steel structures. Whether it's the initial design stages or the final spray – all work done is on-site and leads to a speedier more efficient process.
